DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-8 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims of **U.S. Patent No. 6,506,124** and **US 6,602,144**. For example, both the independent claims in the above patents and the claims in the instant invention recite features including a plurality of pre-impact swing properties, a plurality of club head properties, and a plurality of ball properties. However, the claim in the instant application further define the pre-impact swing properties to include an impact location, an angular velocity, a linear velocity and an orientation of a golf club head. The claim in the instant application further defines the plurality of club head properties to include a plurality of face and mass properties. It also further defines the plurality of the ball properties to include a mass, a radius, a moment of inertia and a coefficient of restitution of the golf ball. Although the conflicting claims are not identical, they are not patentably distinct from each other because the above listed properties of

the instant application just further defines the pre-impact swing properties; the ball properties and the club properties. And these further defined properties that are listed in the instant application are the obvious defining features of the properties that are recited in the patented references.
